

**Australian Government**

**Geoscience Australia**

**Certificate of Verification of a Reference Standard of a Position-Measurement in Accordance with Regulation 13 of the National Measurement Regulations 1999 and the National Measurement Act 1960**

**Name of Verifying Authority:**

**Name:** Geodesy Section

**Organisation:** Geoscience Australia

**Address:** Corner Jerrabomberra Ave and Hindmarsh Drive, Symonston ACT 2609 Australia

**Telephone:** (02) 6249 9111

**Email:** geodesy@ga.gov.au

**Client detail:**

**Name:** Hayden Asmussen

**Organisation:** Department of Environment, Land, Water and Planning

**Address:** Level 11, 2 Lonsdale Street Melbourne, Victoria, 3000

**Telephone:** (03) 9194 0261

**Email:** hayden.asmussen@delwp.vic.gov.au

**Date of request:** 24 October 2017

**Description and denomination of standard of measurement:**

The measurement was undertaken using an antenna TRM57971.00 NONE (International GNSS Service antenna naming convention) with the serial number 1441004384 and refers to a point located 0.0000 m below the antenna reference point. The antenna is attached to a CHS Galvanised Steel mast attached to the roof purlins. The station (4 character ID: WEDD) is located at Loddon Shire Council depot, Ridge Street, Wedderburn, VIC 3518. The certificate was determined using data from 03 September 2017 to 09 September 2017 inclusive. Analysis was undertaken following the procedures detailed in Geoscience Australia's GPS Analysis Manual for the Verification of Position issue 2.1. The reference number of this certificate is WEDD08122017.

**Permanent distinguishing marks:**

Exempt under Regulation 16 (4)

**Date of verification:** 08 December 2017

**Date of expiry of certificate:** 08 December 2022

Accredited for compliance with ISO/IEC 17025. Accreditation No. 15002.

**Value of standard of measurement:**

Station (4 character ID): WEDD

South Latitude and its uncertainty of value:

$36^{\circ} 25' 31.83979'' \pm 0.00026''$  (0.008 m)

East Longitude and its uncertainty of value:

$143^{\circ} 36' 50.51793'' \pm 0.00026''$  (0.008 m)

Elevation above Ellipsoid and its uncertainty of value:

$199.042 \pm 0.021$  m

Geocentric Datum of Australia (GDA2020) coordinates referred to the GRS80 ellipsoid being in the ITRF2014 reference frame at the epoch 2020. The uncertainties are calculated in accordance with the principles of the ISO Guide to the Expression of Uncertainty in Measurement (1995), with an interval estimated to have a confidence level of 95% at the time of verification. The combined standard uncertainty was converted to an expanded uncertainty using a coverage factor,  $k$ , of 2.

**Details of any relevant environmental or other influence factor(s) at the time of verification:**

Uncertainty of the coordinates of the recognized-value standard of measurement of position (i.e. GDA2020); and Uncertainty due to instability of the GPS antenna mounting and modelling of the antenna phase centre variations.
